PROFESSIONAL SUMMARY

Senior Software Engineer with **8 years of experience** designing and building large-scale web platforms and backend frameworks. Extensive experience across JavaScript/TypeScript, Java, Angular, React, and cloud-native architectures.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java 8/11/17/21, Python (AI/automation – PoC), Rust, Go
Front-End: Angular (15 → 22), RxJS, NGRX, NGXS, Angular Material, React, Redux, TailwindCSS, Ant Design, MUI, HTML5, CSS3/SCSS, Lexical, AG-Grid, ECharts
Back-End: Spring Boot, Spring MVC, Spring Data, Spring Security, Spring Batch, Hibernate, JPA, Node.js, Express.js, NestJS, Prisma, Quarkus
Databases: PostgreSQL, Oracle DB, SQL Server, MongoDB, MySQL, Redis
Cloud: AWS (Lambda, Step Functions, S3, DynamoDB, EC2, Elastic Beanstalk, CloudFront), Azure (AD, App Services, CDN, Front Door, Blob Storage, PostgreSQL), OVHcloud
DevOps: Docker, Kubernetes, GitLab CI/CD, Jenkins

PROFESSIONAL EXPERIENCE

Full Stack Developer (Angular / Node.js) — **PREESM GROUP**
May 2026 – Present (5 months)

- Created **Preesm Portal** end to end — product design, **architecture, tech choices and infrastructure**
- Delivered the core modules: **franchisee onboarding**, **document generation with e-signature**, **file deposit**, **users, roles and access**, **billing**, **reporting** and **mailing campaigns**
- Produced the **mockups and full design proposal**, then a fast **Angular 22** SPA on **@kouji-ui**, my own public library, with a **Hono/Node.js** API and PostgreSQL
- Secured the platform (**passkey/MFA**, **deny-by-default RBAC**) and shipped to **staging and production** with **Playwright E2E tests** and quality gates

⚙ `Angular 22 (zoneless, signals), kouji-ui, TypeScript, Tailwind CSS 4, Node.js, Hono, BetterAuth (passkeys, TOTP), Zod, pdf-lib, nodemailer, PostgreSQL 17, Drizzle ORM, S3-compatible storage, Vitest, Playwright, Docker, GitHub Actions, Render, OVH, Caddy, pgBackRest`

Senior Full Stack Developer (Angular / Java) — **AMUNDI ITS**
September 2023 – Present (3 years 1 month)

- Maintained and evolved the **Maestro Angular framework** used by multiple internal and client-facing applications
- Actively participated in **major Angular version migrations (15 → 18 → 20)**, including component upgrades, dependency updates, and adoption of new framework capabilities (Signals, Standalone Components, etc.)
- Built the **Web Designer from scratch** with an **AI agent** for **natural-language generation of web applications** — describe a screen, it scaffolds the JSON-defined views, components and bindings
- Building the **Vibe Toolbox**, an internal **Electron + Angular** desktop app **provisioning AI-ready dev environments** (agent skills, MCP servers), cutting time-to-productivity from days to minutes

⚙ `Angular, TypeScript, Electron, Node.js, Java 8/11/21, Spring Boot, Quarkus, Keycloak, Oracle DB, MongoDB, SQLite, Karma, Jest, Cypress, Playwright, JaCoCo, Webpack, PowerShell, Jenkins, GitLab CI, Claude, Codex, Agile Scrum`

Full Stack Consultant (Java / React) — **ZSOFT CONSULTING**
October 2022 – September 2023 (1 year)

Client: Société Générale — Project: KYC

- Led a **full-backend mission to extract a standalone, reusable microservice** from a legacy **KYC** system, consumable across the organization

⚙ `Java 17, Spring Boot, Spring Security, OAuth2, Quartz, RabbitMQ, PostgreSQL, Flyway, JaCoCo, Docker, Kubernetes, Jenkins`

Client: Colas — Project: CRM

- Deployed the application on **Azure** (App Services, Front Door, CDN, Blob Storage, PostgreSQL) with **CI/CD pipelines**

⚙ `React, TypeScript, Ant Design, Java 11, Spring Boot, Spring Security, Spring Batch, Azure (AD, App Services, CDN, Front Door, Blob Storage, PostgreSQL), GitLab CI/CD`

Client: gloody.co — Project: HR & Business Management SaaS

- Delivered **full-stack features** across the suite — absences & holidays, invoicing, expense reports and meeting booking — with **React / Ant Design** front-ends on **Java / Spring Boot** REST APIs
- Owned the **front-end architecture**, notably a **high-performance calendar** rendering dense scheduling data (absences, holidays, room bookings) with smooth navigation

⚙ `React, TypeScript, Ant Design, SCSS, Java, Spring Boot, REST APIs, AWS`

Full Stack Developer → Project Lead (Java / Angular) — **SCOR**
June 2019 – September 2022 (3 years 4 months)

Project: RiskReveal

- Grew from full-stack developer into **technical / project lead**, validating backend (Spring) delivery and driving implementation across the team
- Built the **data-heavy risk UI** on **AG Grid** — virtualised grids, grouping and aggregation over large **PLT loss datasets**
- Optimized and evolved the **batch orchestration system** (Spring Batch) on large-volume risk data, with **WebSockets** for real-time job progress
- Set up **SSO authentication** with Spring Security, integrating **Azure AD** and **Keycloak** as identity providers

⚙ `Angular 12, Ant Design, AG Grid, WebSockets, Java 8, Spring Boot, Spring Batch, Spring Security, Keycloak, Azure AD, SQL Server, Azure DevOps, Jenkins`

SIDE PROJECTS

Orrery — Multi-Agent Git Orchestrator IDE (Desktop)

⚙ `Angular 20, TypeScript, RxJS, CodeMirror 6, Lexical, Tauri 2, Rust, Vitest, Playwright, GitHub Actions`

Vortex — Enterprise LLM Gateway

⚙ `Angular 22 (zoneless), Angular SSR, TypeScript, @kouji-ui, Node.js, Hono, Zod, Stripe, PostgreSQL, Drizzle ORM (RLS), Redis, Playwright, pnpm, Docker, Render`

Kouji UI — Angular Design System & Component Library

⚙ `Angular 21, TypeScript, Tailwind CSS, Vitest, Playwright, axe-core, ESLint, Prettier, Husky, Angular CLI, pnpm workspaces, Turborepo, Changesets, GitHub Actions`

EDUCATION

State Engineering Diploma in Computer Science — National School of Applied Sciences of Tangier — 2019

LANGUAGES

Arabic — Native · **French** — Fluent · **English** — Professional
