PROFESSIONAL SUMMARY

Senior Software Engineer with **7+ years of experience** designing and building large-scale web platforms and backend frameworks. Extensive experience across JavaScript/TypeScript, Java, Angular, React, and cloud-native architectures.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java 8/11/17/21, Python (AI/automation – PoC), Rust, Go
Front-End: Angular (15 → 22), RxJS, NGRX, NGXS, Angular Material, React, Redux, TailwindCSS, Ant Design, MUI, HTML5, CSS3/SCSS, Lexical, AG-Grid, ECharts
Back-End: Spring Boot, Spring MVC, Spring Data, Spring Security, Spring Batch, Hibernate, JPA, Node.js, Express.js, NestJS, Prisma, Quarkus
Databases: PostgreSQL, Oracle DB, SQL Server, MongoDB, MySQL, Redis
Cloud: AWS (Lambda, Step Functions, S3, DynamoDB, EC2, Elastic Beanstalk, CloudFront), Azure (AD, App Services, CDN, Front Door, Blob Storage, PostgreSQL), OVHcloud
DevOps: Docker, Kubernetes, GitLab CI/CD, Jenkins

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer (Angular / Java)

AMUNDI ITS

Since September 2023

- Maintained and evolved the **Maestro Angular framework** used by multiple internal and client-facing applications
- Actively participated in **major Angular version migrations (15 → 18 → 20)**, including component upgrades, dependency updates, and adoption of new framework capabilities (Signals, Standalone Components, etc.)
- Built the **Web Designer from scratch** and integrated an **AI agent** enabling **natural-language-driven generation of dynamic web applications** — users describe screens or flows in plain language and it scaffolds the corresponding JSON-defined views, components and bindings, ready for further refinement
- Currently building the **Vibe Toolbox**, an internal **desktop application (Electron + Angular, Node.js/TypeScript backend, SQLite, PowerShell automation)** that **provisions AI-ready development environments** — managing **agent skills, MCP servers and artifact installation** — for engineers across the organisation, reducing time-to-productivity from days to minutes

⚙️ Angular, TypeScript, Node.js, Electron, SQLite, PowerShell, Java 8/11/21, Spring Boot, Quarkus, Keycloak, Oracle DB, MongoDB, Karma, Jest, JaCoCo, Cypress, Playwright, Webpack, Jenkins, GitLab CI, Claude, Codex, Agile Scrum

Full Stack Consultant (Java / React)

ZSOFT CONSULTING

October 2022 – September 2023 (1 year)

Client: Société Générale — Project: KYC

- Led a **full-backend mission to extract a standalone, reusable microservice** from a legacy KYC system, consumable by other applications across the organization
- Implemented security mechanisms using Spring Security and OAuth2
- Provided **L2 support**, investigating and resolving production incidents

⚙️ Java 17, Spring Boot, Spring Security, OAuth2, PostgreSQL, Quartz, Flyway, JaCoCo, Docker, Kubernetes, RabbitMQ, Jenkins

Client: Colas — Project: CRM

- Built the application **from scratch**, from mockups to production deployment
- Implemented the UI from designer mockups using **React and the Ant Design system**, with consistent, reusable components
- Implemented secure authentication with **Azure AD (IAM / SSO)**, integrated via Spring Security
- Deployed the application on **Azure** across multiple environments — App Services, Front Door, CDN, Blob Storage and Azure Database for PostgreSQL — with CI/CD pipelines

⚙️ React, TypeScript, Ant Design, Java 11, Spring Boot, Spring Security, Spring Batch, Azure (AD, App Services, CDN, Front Door, Blob Storage, PostgreSQL), GitLab CI/CD

Client: Gloody — Project: HR & Business Management SaaS

- Delivered **full-stack features** across the suite — absences & holidays, invoicing, expense reports and meeting booking — with **React / Ant Design** front-ends on **Java / Spring Boot** REST APIs
- Owned the **front-end architecture**, notably a **high-performance calendar** rendering dense scheduling data (absences, holidays, room bookings) with smooth navigation

⚙️ React, TypeScript, Ant Design, SCSS, Java, Spring Boot, REST APIs, AWS

Full Stack Developer → Project Lead (Java / Angular)

SCOR

June 2019 – September 2022

- Grew from full-stack developer into **technical / project lead**, validating backend (Spring) delivery and driving implementation across the team
- Optimized and evolved the **batch orchestration system** (Spring Batch) on large-volume risk data, with **WebSockets** for real-time job progress
- Set up **SSO authentication** with Spring Security, integrating **Azure AD** and **Keycloak** as identity providers
- Refactored the frontend onto a **single, unified design system (Ant Design)**, removing legacy **PrimeNG** components

⚙️ Java 8, Spring Boot, Spring Batch, Spring Security, Angular 12, Ant Design, WebSockets, Azure AD, Keycloak, SQL Server, Azure DevOps, Jenkins

SIDE PROJECTS

Orrery — Multi-Agent Git Orchestrator IDE (Desktop)

⚙️ Tauri 2, Rust, Angular 20, TypeScript, CodeMirror 6, Lexical, RxJS, Vitest, Playwright, GitHub Actions

Vortex — Enterprise LLM Gateway

⚙️ Angular 22 (zoneless), TypeScript, Hono, Node.js, PostgreSQL, Drizzle ORM (RLS), Redis, Zod, Stripe, @kouji-ui, Angular SSR, Playwright, Docker, pnpm, Render

Kouji UI — Angular Design System & Component Library

⚙️ Angular 21, TypeScript, Angular CLI, pnpm workspaces, Turborepo, Vitest, Playwright, axe-core, ESLint, Prettier, Husky, Changesets, Tailwind CSS, GitHub Actions

EDUCATION

State Engineering Diploma in Computer Science — National School of Applied Sciences of Tangier — 2019

LANGUAGES

Arabic — Native · **French** — Fluent · **English** — Professional
